

It Pays to Participate

Earn incentives on geothermal and heat pump water heater technology and build your business with the NYS Clean Heat Program.

How to apply for an incentive:

1. Enroll as an NYS Clean Heat participating contractor at nystatewidecmp.programprocessing.com.
2. Select and purchase eligible equipment depending on your customer's needs and Manual J calculations.
3. Install qualified equipment for an NYSEG or RG&E customer. See eligibility requirements on back.
4. Submit projects on the NYS Clean Heat Program online portal and get paid! Visit cleanheat.ny.gov/contractors.

Learn more at SaveEnergy.ny.gov/NYSCleanHeat.

Customer rebates and contractor rewards available:

Save your customers money while earning some for yourself!

Category	Technology	Incentive	Total Incentive	Participating Contractor Reward ¹
3	GSHP: Full Load Heating	\$/10,000 Btu/h of full load heating capacity as certified by AHRI ²	\$1,500	\$500/project
5	Air-Source HPWH (≤ 120 gal)	\$/Unit	\$700	N/A
5 Midstream	Midstream Air-Source HPWH (< 120 gal)	\$/Unit ³	\$800	\$50 contractor \$50 distributor
7	GSHP Desuperheater	\$/Unit	\$100	N/A
8	Dedicated DHW WWHP	\$/Unit	\$900	N/A

¹ Each participating contractor may retain up to the participating contractor reward amount shown in the incentive table. The balance of the total incentive less the participating contractor reward must be passed or otherwise credited to the customer in its entirety.

² Total incentive to be limited to 120% of BHL – For example, Total Incentive ≤ ((Full Load GLHP Rating OR Full Load GWHP Rating x 1.2)/HP sizing ratio). See Equipment Sizing Requirements in Appendix 2 of the program manual for additional details.

³ Available for heat pump water heaters purchased through the instant rebate program at participating retailers. Contractors who are submitting applications with both air-source heat pumps and HPWH cannot receive the \$100 additional reward.

List of eligible NYS Clean Heat equipment:

Category Number	Description	Eligible Technologies	Eligibility Requirements
3	GSHP: Full Load Heating	Ground Source Heat Pump ("GSHP")	<ul style="list-style-type: none"> Each heat pump in the system must meet or exceed the ENERGY STAR® Geothermal heat pump specification. Console units and non-console heat pump appliances with less than 24,000 Btu/h rated full load cooling whose performance does not meet or exceed ENERGY STAR specifications must apply for incentives under Category 4 Total heat pump system heating capacity is < 300,000 Btu/h Ground source variable refrigerant flow heat pumps ("GSVRFs") are eligible for incentives in Category 3 if the full load heating capacity is < 300,000 Btu/h. GSVRF systems, regardless of total heating system size or individual appliance cooling capacity, must meet or exceed the minimum efficiencies listed in Table 6. GSVRF full load heating capacity is determined at 32°F entering water temperature System consists only of individual appliance cooling capacity for open-loop and closed-loop GSHP installs < 135,000 Btu/h and/or individual appliance cooling capacity for direct exchange GSHP installs ≤ 180,000 Btu/h Ground loops must comply with applicable New York Department of Environmental Conservation ("NY DEC"), New York City ("NYC"), and International Ground-Source Heat Pump Association ("IGSHPA") standards Total heat pump system heating capacity satisfies at least 90% of the BHL. Systems sized for > 120% BHL may incur further review and require justification
5 and 5 Midstream	HPWH (up to 120 gallons of tank capacity)	Air-to-water HPWHs Dedicated DHW WWHP (<120 gallons)	Air-to-Water HPWHs with storage capacities up to 120 gallons must meet or exceed ENERGY STAR Residential Water Heater specification
7	GSHP Desuperheater	Optional component to GSHP systems	Installed as integrated component in an eligible GSHP
8	Dedicated Domestic Hot Water ("DHW") Water-to-Water Heat Pump ("WWHP")	Dedicated DHW WWHP (<120 gallons) added to ground loop	Can be integrated into an eligible GSHP or installed as a separate WWHP meeting or exceeding ENERGY STAR Geothermal specifications Must meet 100% of water heating load

Based on Version 10 of the NYS Clean Heat Program Manual

Heat pump water heater incentives are limited to one per customer. If you require more than one unit, please contact the program team.
