

## Product Content Label

The product is sold in blocks of 50 kWh<sup>1</sup> per month. The product is comprised of the following renewable resources in the proportion listed below.

| Renewable Resources <sup>2</sup> in Catch the Wind | Generation Location |
|--|---------------------|
| 100% Wind  | NY                  |

The kWhs above represent the resource makeup of each block of renewable electricity available to be purchased from NYSEG and 3Degrees. The remainder of your electricity contains the following mix of electricity resources from NYSEG: Nuclear (23%), Hydroelectric (23%), Coal (12%), Natural Gas (36%), Oil (4%) and Other (1%). If your supplier is an ESCO, please refer to their environmental disclosure.

<sup>1</sup> There is a minimum two-block purchase. The average home in the NYSEG territory uses about 600 kWh/month. A two-block purchase is therefore equivalent to approximately 17% of the electric usage in the average household within the NYSEG territory.

<sup>2</sup> Includes only generators that began operating on or after January 1, 2001.

For specific information about this product, contact 3Degrees, Inc., 1.800.994.1314. Customers who enroll in this program will receive an annual participation report.

An Environmental Disclosure Label for the electricity used is prepared in accordance with New York State Public Service Commission requirements. To learn more about Environmental Disclosure Program in New York State, visit [www.dps.state.ny.us/](http://www.dps.state.ny.us/).
