

Energy Management Partnership Program

Unlock the power of energy efficiency!

Join the Energy Management Partnership program

Empower your business with our EMP program tailored for medium to large commercial buildings and industrial plants.

What is the EMP program?

Energy Management Partnership (EMP) is a holistic approach to identifying and implementing low- and no-cost energy efficiency improvements. Your company could achieve significant energy savings through ongoing enhancements and investments sustainable practices.

Key benefits

Reduced energy costs - Reduce your utility bills by saving money and energy through low- and no-cost efficiency improvements and behavioral changes.

- Improved facility performance
- Sustainable business practice
- Prolonged equipment life
- Vendor-neutral energy consulting and customized solutions
- Strengthen brand identity with a commitment to a sustainable future
- Comprehensive concierge service for all funding opportunities within the NYSEG/RG&E rebate portfolio, plus an additional 25% rebate bonus for projects up to \$25k each

Personal EMP coach

We will provide a dedicated EMP coach who will guide you through the process and help your team achieve optimal energy efficiency and operation.

Learn how to build a successful EMP team

- **Executive sponsors**
Coordinate with senior management dedicated to the mission of energy management.
- **Energy champion**
Identify the key member who is accountable for executing the strategy and assuring continuous enhancements.
- **Energy team collaborators**
Leverage the talent you already have in-house to advance energy efficiency at your organization.

Save 2-5%

 of your total energy use

Elevate your energy strategy and unlock the power of savings. Your journey to a more energy-efficient future begins with NYSEG and RG&E.
