SERVICE UNDER THIS CLASSIFICATION SHALL NO LONGER BE AVAILABLE TO NEW CUSTOMERS AFTER SEPTEMBER 13, 1996 AND EXISTING CUSTOMERS SHALL NO LONGER BE PERMITTED TO ADD NEW LIGHTS TO EXISTING ACCOUNTS AFTER DECEMBER 1, 2020. STREET LIGHTING SERVICE WITH CONTRIBUTORY PROVISIONS

APPLICABLE TO THE USE OF SERVICE FOR:

Street, highway, roadway or other outdoor lighting for duly constituted public agencies, public authorities and public Companies.

Rates and charges, indicated with an asterisk (*), are applicable to equipment installed or contracted for prior to effective date of this leaf. Such facilities are no longer available for new installations under this service class. Upon failure and fulfillment of contract, lights shall not be replaced in kind. Customer may select an alternative luminaire from the tariff.

CHARACTER OF SERVICE:

Limited Period-Unmetered Service; controlled from dusk (½ hour after sunset) to dawn (½ hour before sunrise), for approximately 4213 hours per year.

Existing Company owned systems or existing systems built by others to Company standards, with the below listed luminaires and other facilities, shall be served under this service classification. Under this schedule, the capital cost of all facilities is borne by the customer (see Determination of Capital Costs), but ownership and the responsibility for operation and maintenance rests with the Company. In the case of facilities installed by others, the Company reserves the right to reject all or any part of such street lighting systems that do not meet general Company specifications or are not compatible with the type and nature of existing Company facilities. Installation of equipment on Company owned electric facilities shall be done only by the Company. The Company reserves the right to refuse ownership of systems subject to extraordinary maintenance requirements or unusually high incidents of physical damage.

The rates specified in this service classification do not provide for replacement due to expiration of the service life of installed fixtures, standards or other equipment.

The customer may designate the following types of service:

- A. Overhead Service, on poles which are a part of the Company's general distribution system or the Company's poles installed at customer's expense, specifically for street lighting. The street lighting equipment is available only in those areas where an overhead distribution system is maintained by the Company.
- B. Underground Service, supplied from an existing underground circuit or installation of new underground circuit. The street lighting equipment is owned and maintained by the Company. To minimize cost of underground street lighting systems, construction should be undertaken at the time of installation of general underground distribution system. (See Section 9 of General Information.)

Note: The rating of lamps in lumens is for identification purposes only and shall approximate the manufacturer's standard rating.
